PT. PRATAMA PLASTINDO UTAMA

is a company that has been growing rapidly in producing innovative and high demand plastic products. As the forefront of this industry for many years, we specialized to deliver high-quality plastic products for all of our customers. Some of the plastic materials that we work within large volumes are PP PVC, PE, HDPE and PET. We also supply UPVC roofing for industrial and residential uses, gardenhoses, water containers and decorative plastic sheets.

We pride our efficient use of raw materials as well as recycling 100% of all waste making our end products much less costly as compared to our competitors. Our facilities build in 4 hectares area located in Jakarta, Indonesia. JWe will support the delivery process, anywhere in the country and the rest of the world.

PT. PPU has over 1000 staff managed by a world-class team of professionals that are leaders in the industry. With such a synergized team of people, we are a strong and focused force in the business of plastic manufacturing. Let's be our partner and feel the experience of our expertise in cutting edge product innovations and see your business grow fast.

Our vision is to keep being the number one market leader in plastic product manufacture and meeting all our customers demand by continuously investing through innovation and exceeding quality satisfaction.

Our continuous growth should never destruct the environment, thus we build a commitment to reduce waste and improve energy efficiency in all aspects of our business.

Bpk. Sudinardi Kusmuljadi

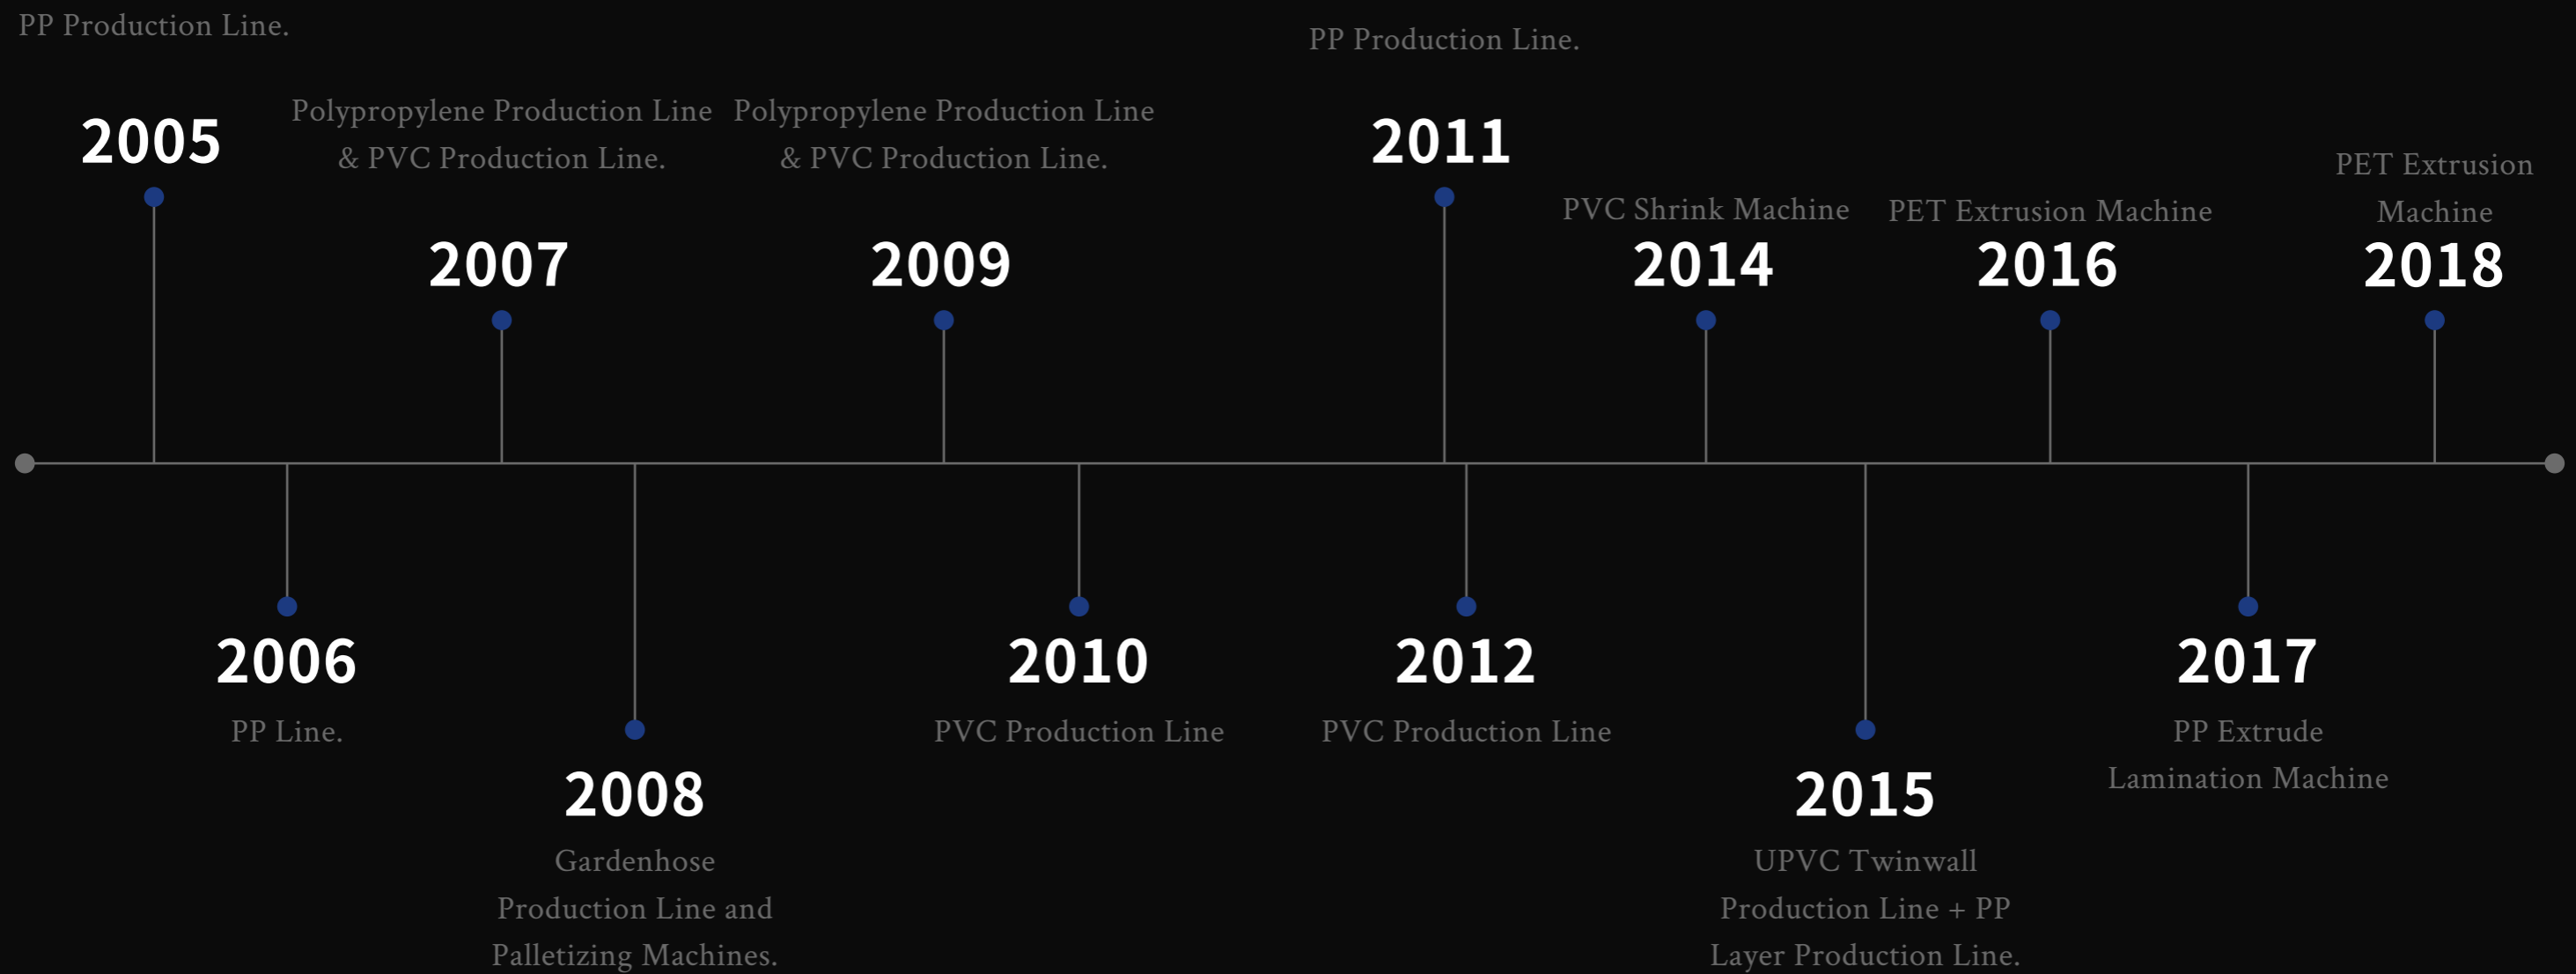

Komisaris

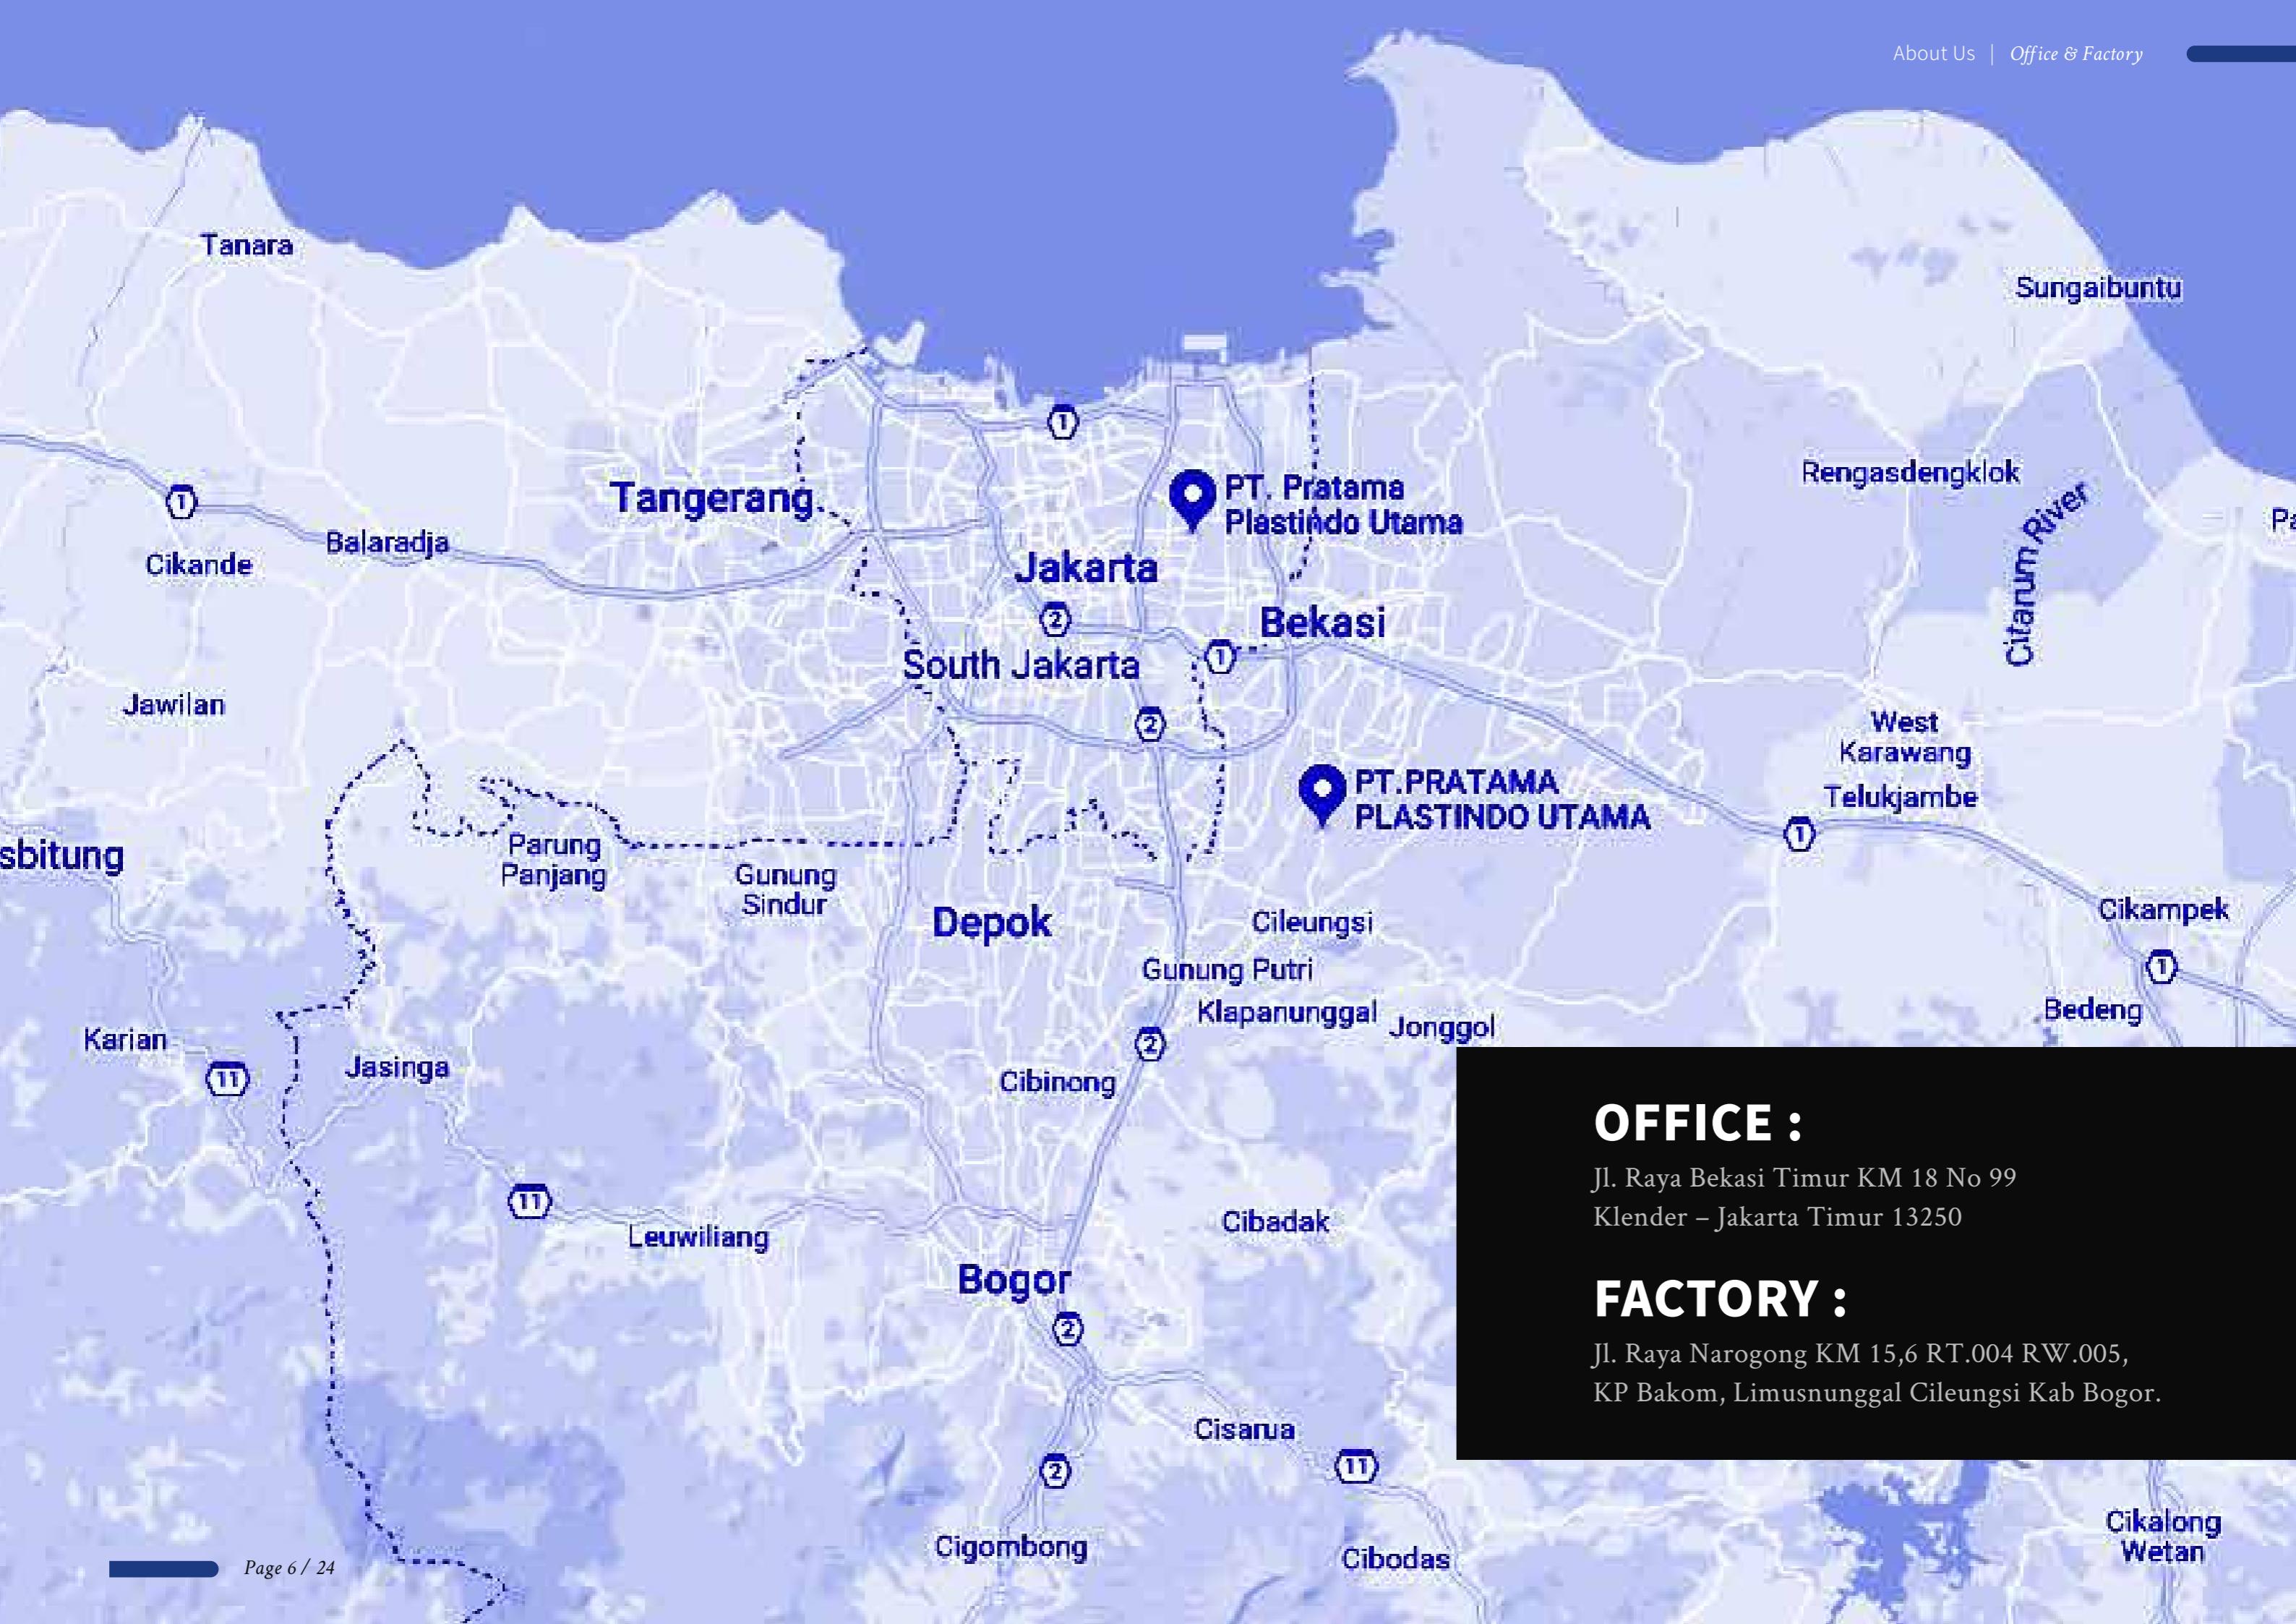

Bpk. Sudisemi Kusmuljadi

Direktur Utama

PT. Pratama Plastindo Utama was established in 2005 after the restructuring from a family oriented business. Grown rapidly in the last decade, we expanded the manufacturing capabilities by adding machines in order to meet both our local and international customer's demands.

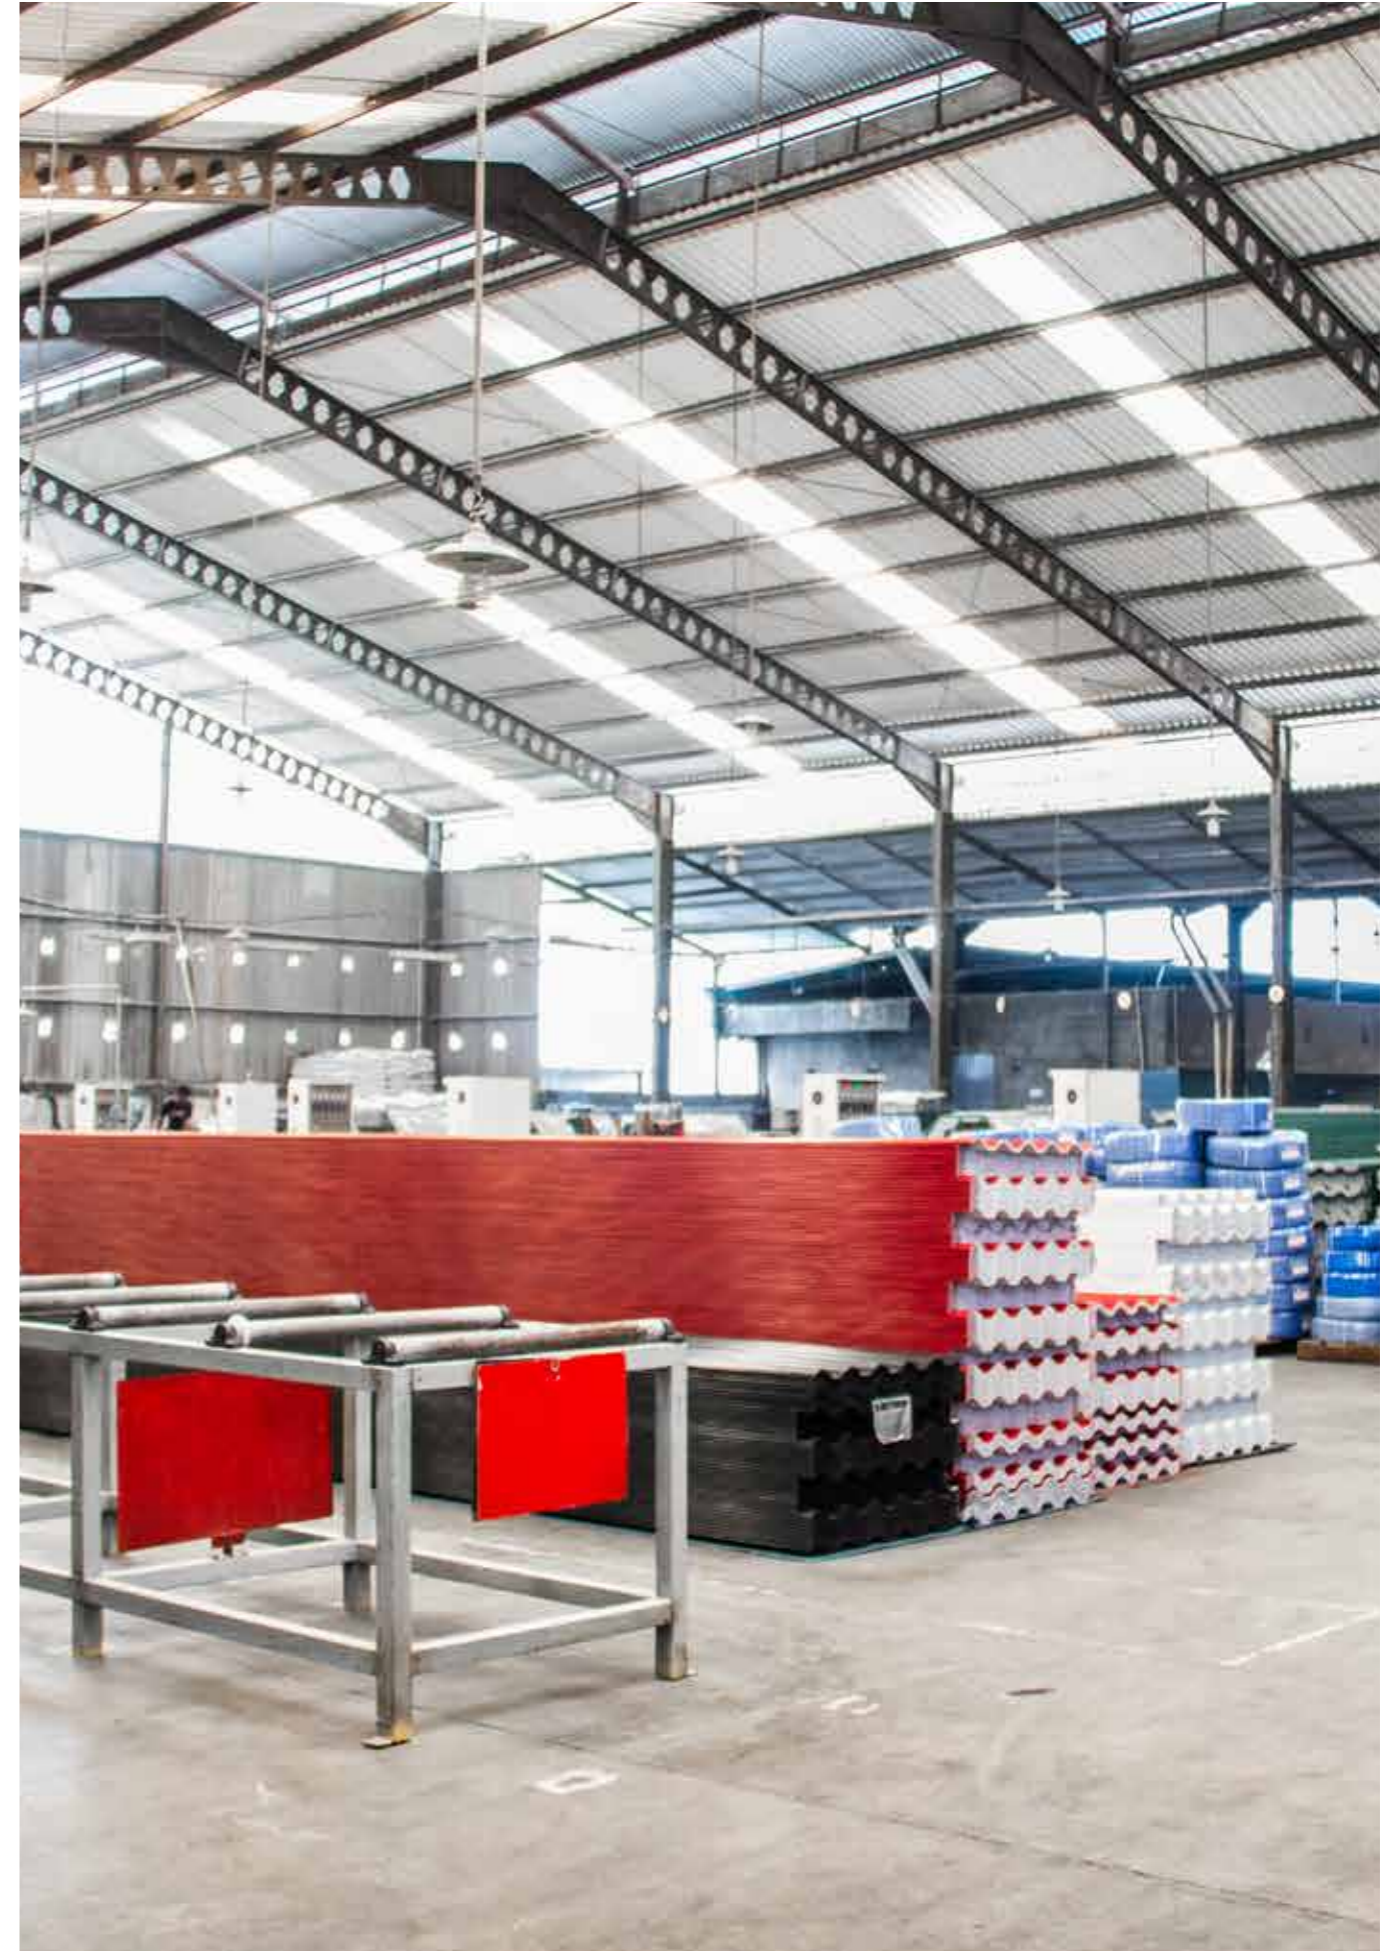

OFFICE :

Jl. Raya Bekasi Timur KM 18 No 99
Klender – Jakarta Timur 13250

FACTORY :

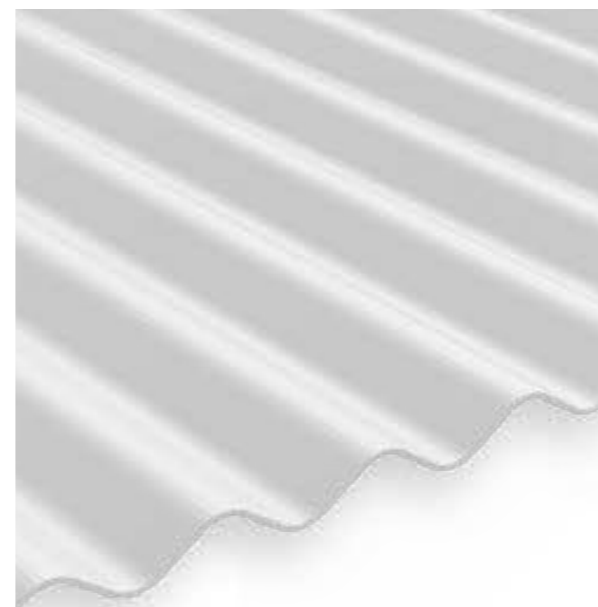

Jl. Raya Narogong KM 15,6 RT.004 RW.005,
KP Bakom, Limusnunggal Cileungsi Kab Bogor.

1. POLYPROPYLENE (PP) CORRUGATED ROOF

Polypropylene (pp) Corrugated Roof is a very strong and resilient thermoplastic material. PP is also very lightweight and capable of withstanding extreme temperatures, either hot or cold. Due to these qualities it makes for an effective roofing material for many applications. While Polypropylene roofing may not be the best option for an entire house; it is ideal for other structures such as decks, garages, patios, sheds, and conservatories.

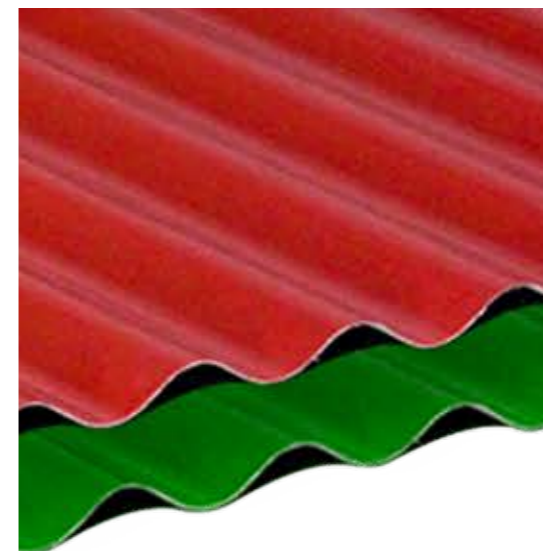

Polypropylene (PP)
Corrugated Roof

| | |
|-----------------|---------|
| Full Width | 830 mm |
| Effective Width | 75 mm |
| Weight | 1,25 kg |
| Color | Clear |

Polypropylene (PP)
Corrugated Roof

| | |
|-----------------|---------|
| Full Width | 830 mm |
| Effective Width | 75 mm |
| Weight | 1,25 kg |
| Color | White |

Polypropylene (PP)
Corrugated Roof

| | |
|-----------------|-------------|
| Full Width | 800 mm |
| Effective Width | 73 mm |
| Weight | 1,2 kg |
| Color | Red & Green |

2. POLYPROPYLENE (PP) SHEET / ROLL

Polypropylene lamination films offer a clear and bright finish for a variety of applications. Polypropylene is a soft film that folds easily and features inherent dry erase (write-on, wipe-off) properties.

A combination of good performance characteristics and low price point make Polypropylene laminating ideal for applications including, dry erase boards and calendars, and product packaging.

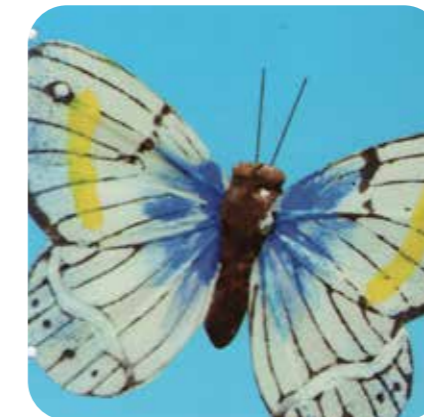

The embossing process can modify surface areas, elasticity thresholds, coefficients of friction, as well as impact layflat, gloss, reduce noise, adhesion, and alter the bulk density of the film. Embossing can increase the thickness of the material without adding weight to the film.

| | Material | Thick | Packing | Size & Weight | Color |
|----|---------------|---------|----------|--|------------------|
| 1. | PE + Almunium | 0,60 mm | 50 Meter | 55 cm = 15,5 kg, 60 cm = 17kg 70 cm = 19,7 kg, 90 cm = 12,5kg 110 cm = 31 kg, 120cm = 34kg | Aluminium & Blue |

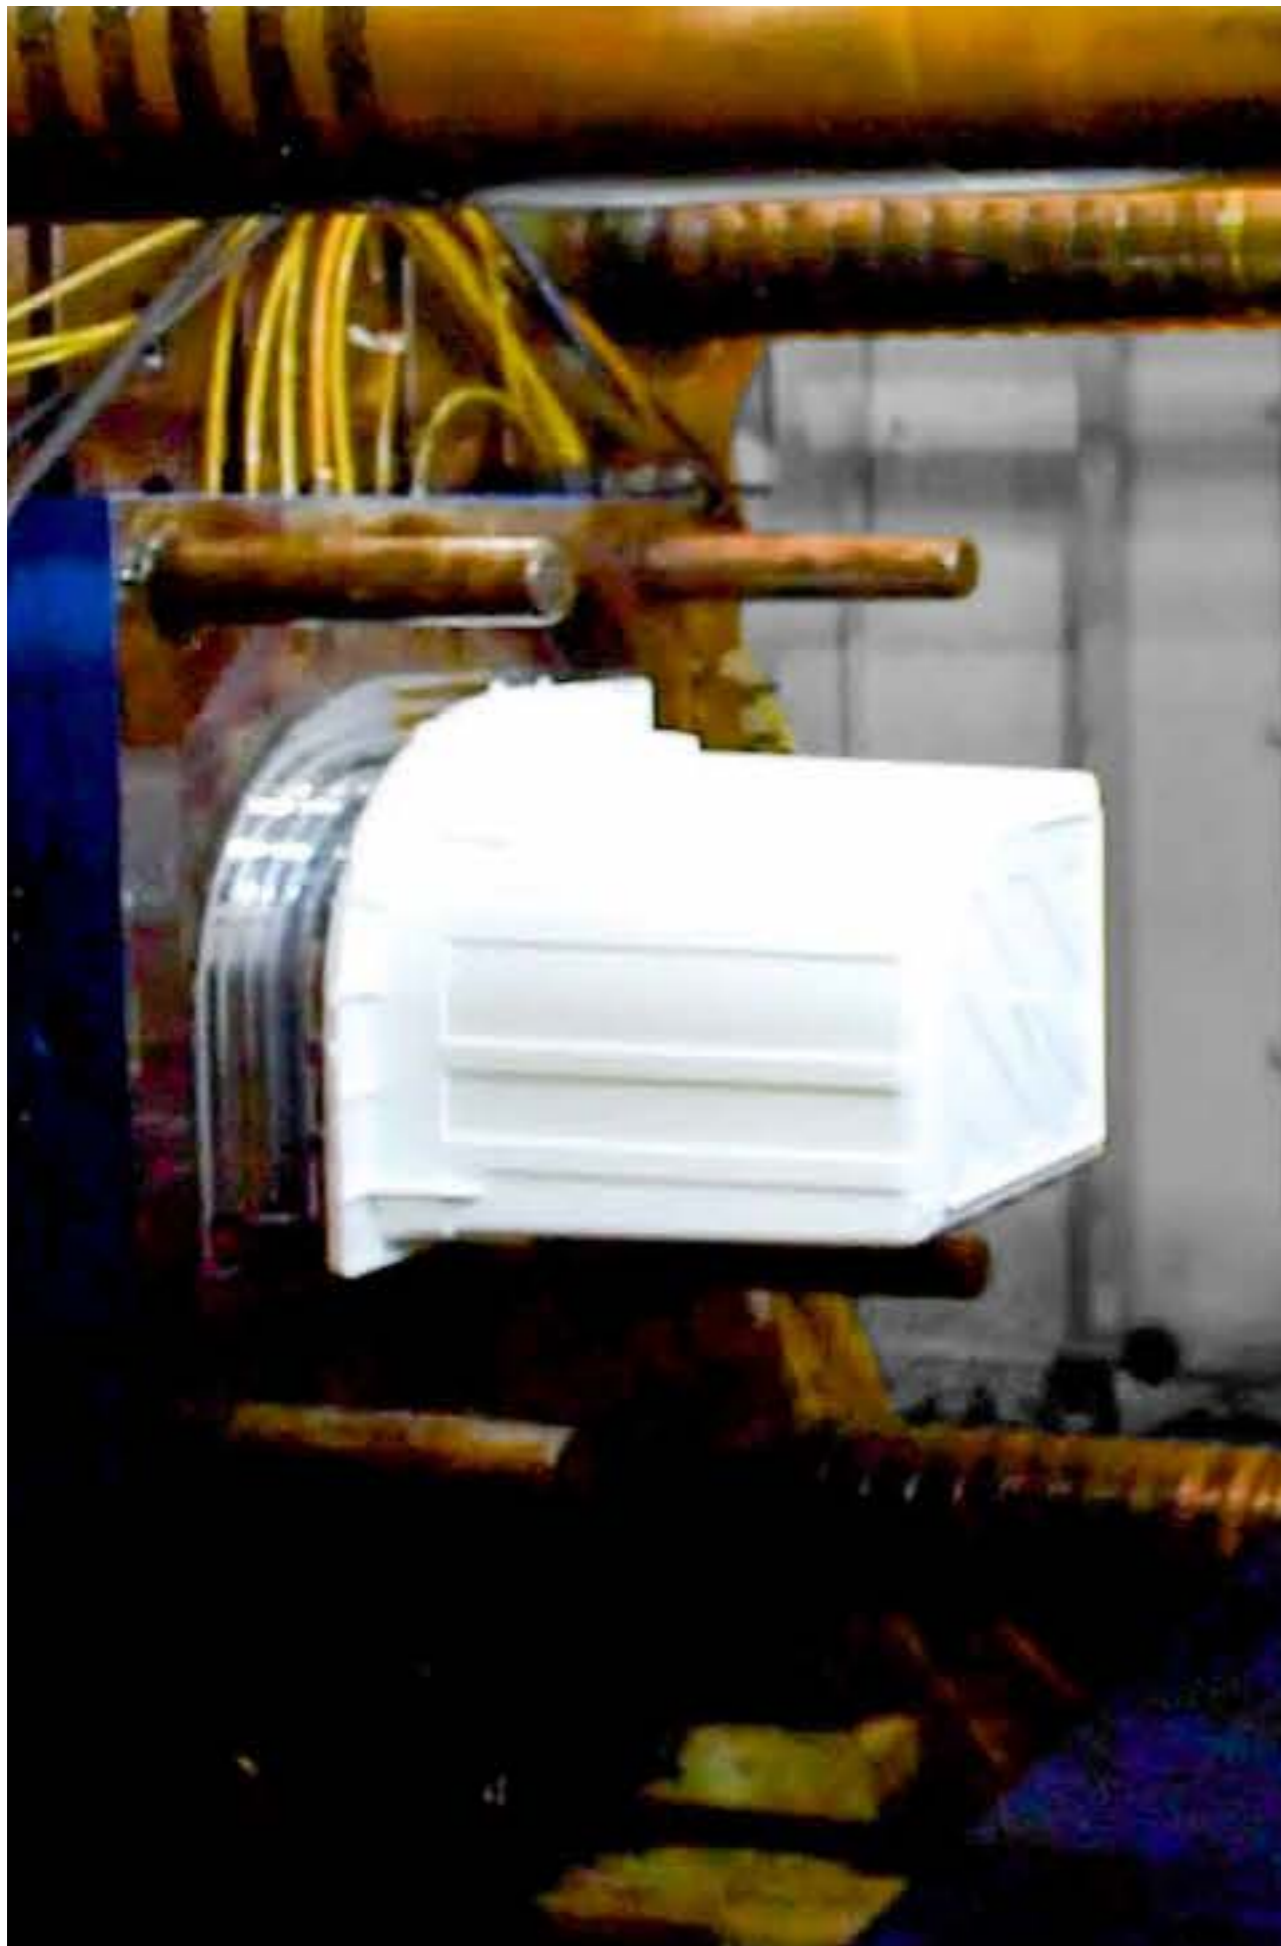

SOME OF OUR MOTIVES

| | |
|-----------|---------|
| Thickness | 0,6 mm |
| | 0,7 mm |
| | 0,8 mm |
| | 1,2 mm |
| Lenght | 30-50 m |

*We have over 100+ varieties, contact us for more information

3. POLYPROPYLENE (PP) WATER CONTAINER

Plastic water container are strong, light-weight and more cost effective than alternative materials the flexibility of plastic allows for variety of styles and shapes

Plastic container are easier to install due to their strength and lightness

A wide range of colours to match your taste colour is actually within the plastic material so your container remains looking new longer

Polypropylene (PP) Water Container

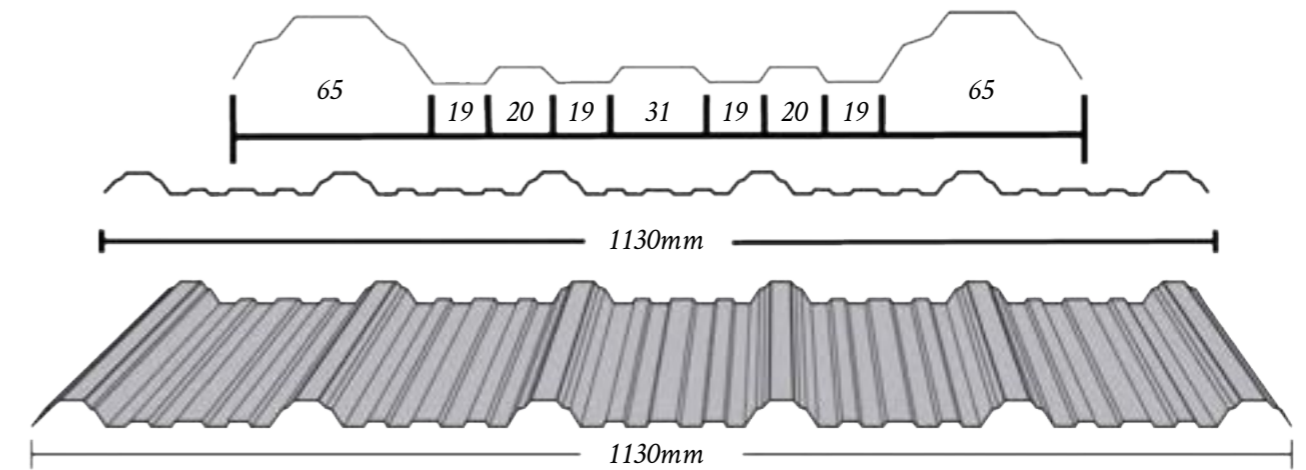

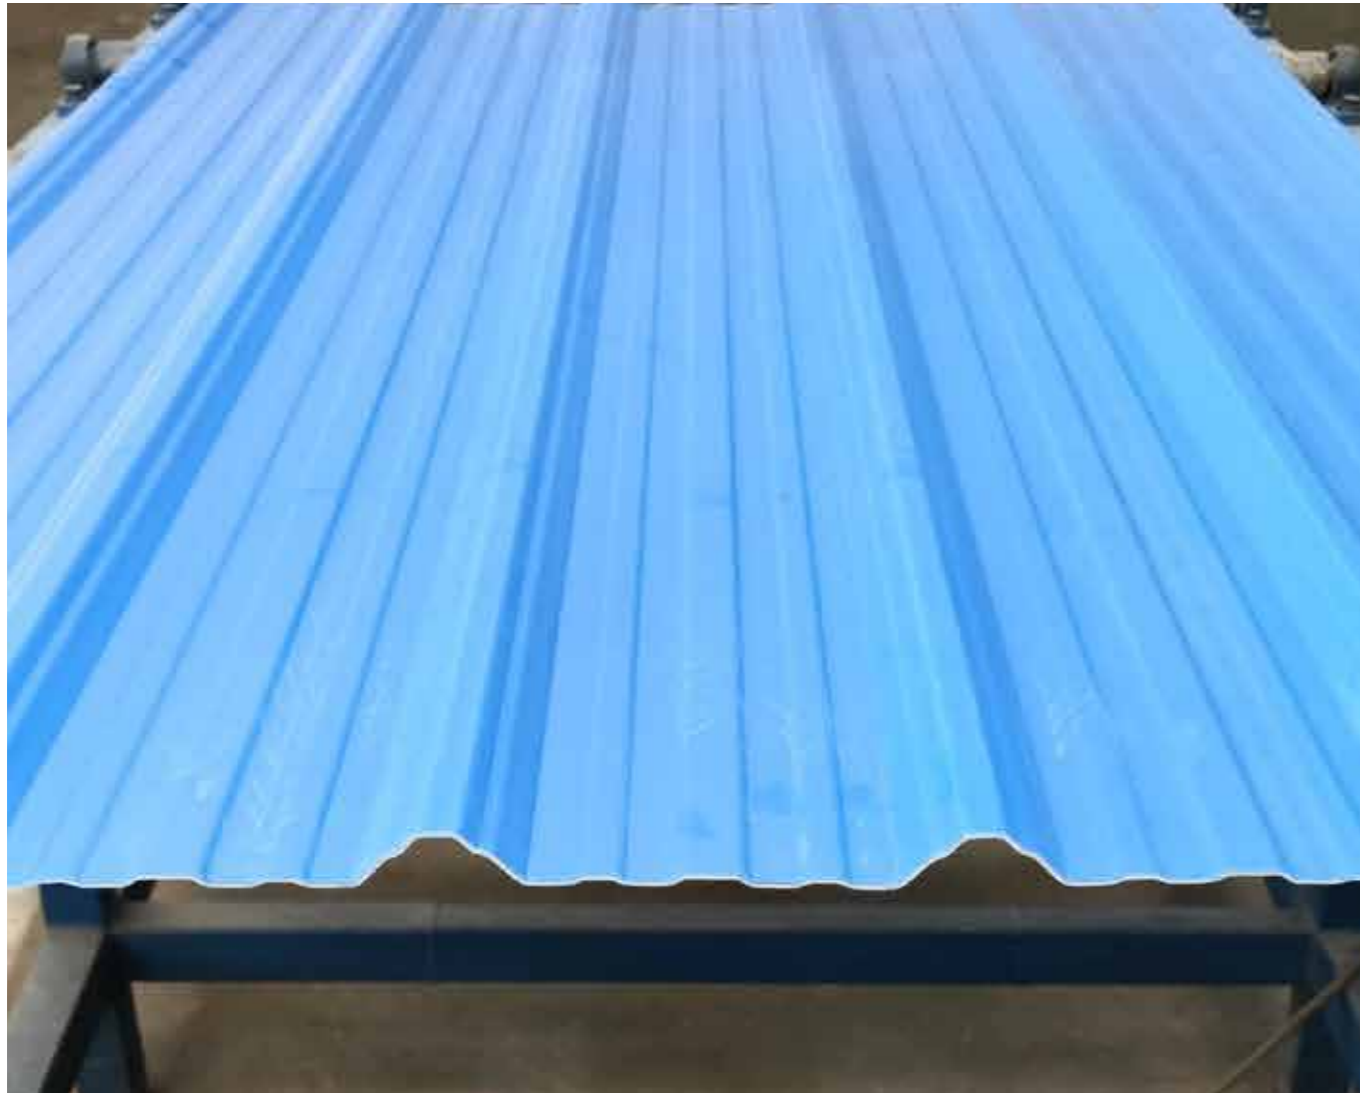

| | |
|--------------|--------------------------------------|
| Size (liter) | 120 |
| Size (cm) | T. 60 x L.55 cm |
| Completeness | Water Container Accessories |
| Color | White, Cream, Pink, Maroon and Green |

4. POLYVINYL CHLORIDE (PVC) CORRUGATED ROOF

Polyvinyl Chloride (PVC) Roofing membrane roofing, is a high performing, low slope roofing solution. PVC membranes' natural strength, waterproofing ability and fire resistance make them an affordable and sustainable cool roofing material. Vinyl's extended life cycle and the associated low energy consumption to produce the raw material and process it into vinyl roofing is a significant factor in its usability as a building product.

5. 3 LAYER COMPOSITE & TRANSLITE UPVC ROOF

Top Layer

Is of Anti UV layer which is specially made to improve optical properties. Surface Layer The material is ultra weather resistant; to block the ultra violet and reduce the coefficient of heat conductivity, ensure product durability and resistance to chemical corrosion.

Second Layer

Contains multi foam giving to the material light weight and improved sound and thermal insulating properties.

Underlying Layer

For just a good material toughness special to ensure the strength at the same time, increase the rigidity and light illumination.

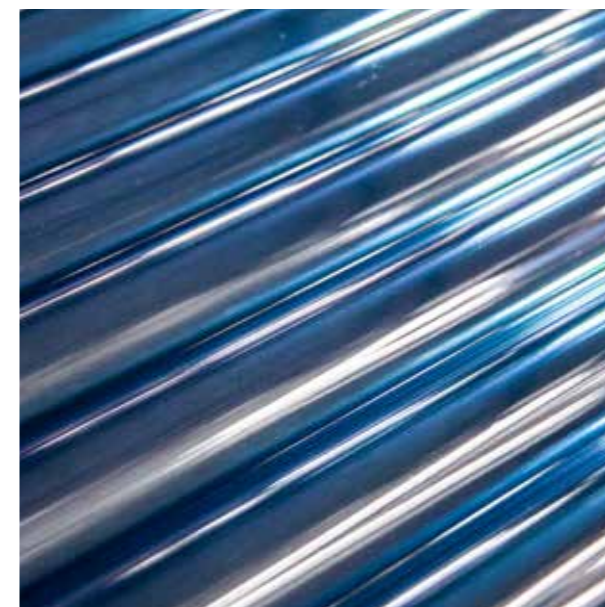

6. TWINWALL CORRUGATED (UPVC) ROOF

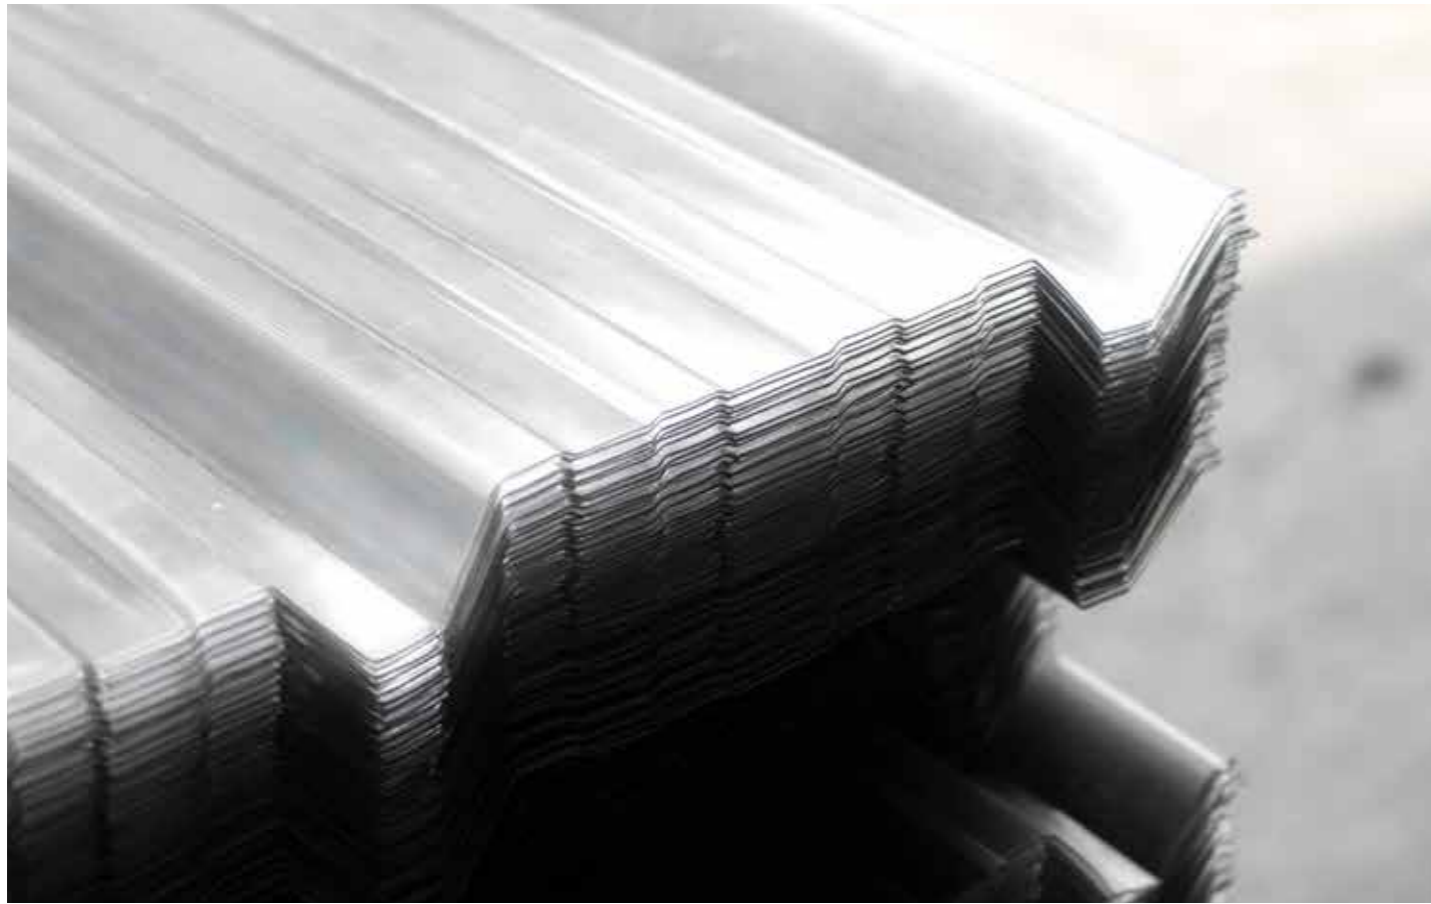

Twinwall UPVC corrugated sheet is the newest product that adopts both PVC high weather resistant engineering plastic and the most advanced triple extrusion technology for one-off processing, which are made of imported extra weather resistant engineering resin. It boasts extraordinary durability in natural environment. The hollow structure provide super heat insulation for workshop, private and public buildings.

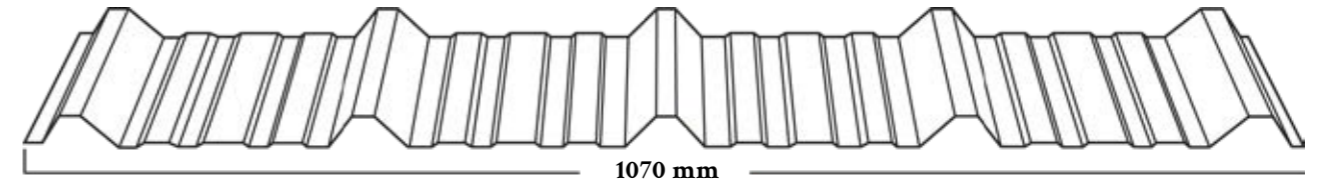

7. POLYTHYLENE TEREPHTHALAT (PET) CORRUGATED ROOF

| | |
|-------|-------------------------------------|
| Type | Standard |
| Size | Standard 0.8 0,8mm x 80cm |
| | Standard 0.8 0,6mm x 80cm |
| | Standard 1.0 1.0mm x 80cm |
| Color | Clear |

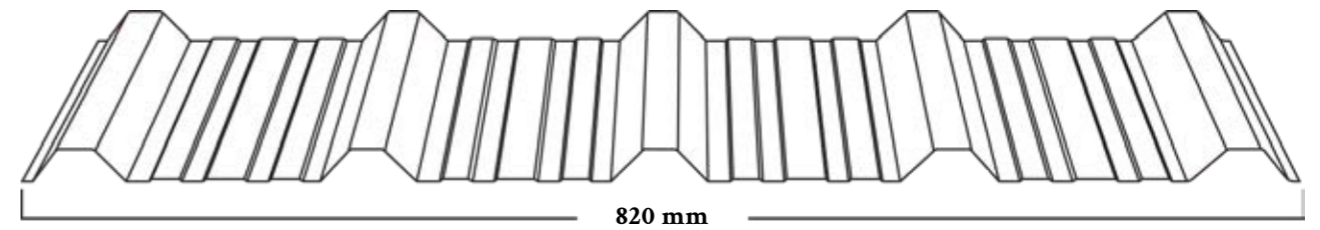

PET Trimdeck K-100

| Lebar Full | Lebar Efektik | Tebal | Berat | |
|------------|---------------|-------|--------|-------|
| 1070 mm | 1000 mm | 1 mm | 1,7 kg | Clear |

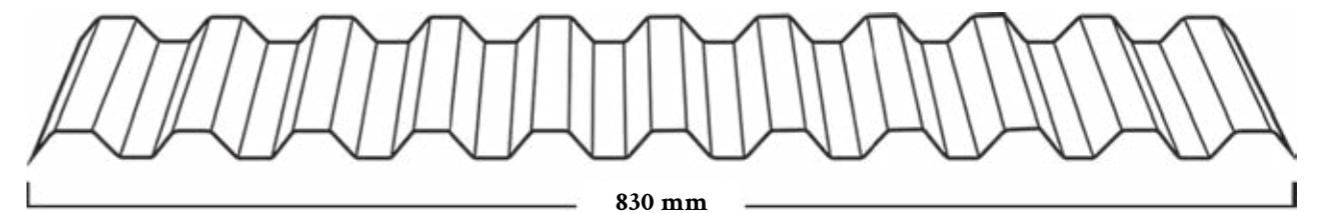

PET Trimdeck K-75

| Lebar Full | Lebar Efektik | Tebal | Berat | |
|------------|---------------|-------|--------|-------|
| 820 mm | 750 mm | 1 mm | 1,2 kg | Clear |

PET Greca K-75

| Lebar Full | Lebar Efektik | Tebal | Berat | |
|------------|---------------|-------|---------|-------|
| 830 mm | 750 mm | 1 mm | 1,25 kg | Clear |

8. DOP & YARN GARDENHOSE

GARDENHOSE

| | |
|--------|------------------------|
| Type | Premium Yarn Waterhose |
| Size | 1/2", 5,8", 3/4", 1" |
| Lenght | 100 m / 50 m |

| | |
|--------|----------------------|
| Type | Dop Waterhose Echo |
| Size | 1/2", 5,8", 3/4", 1" |
| Lenght | 50 m |
| Warna | Green, Blue |

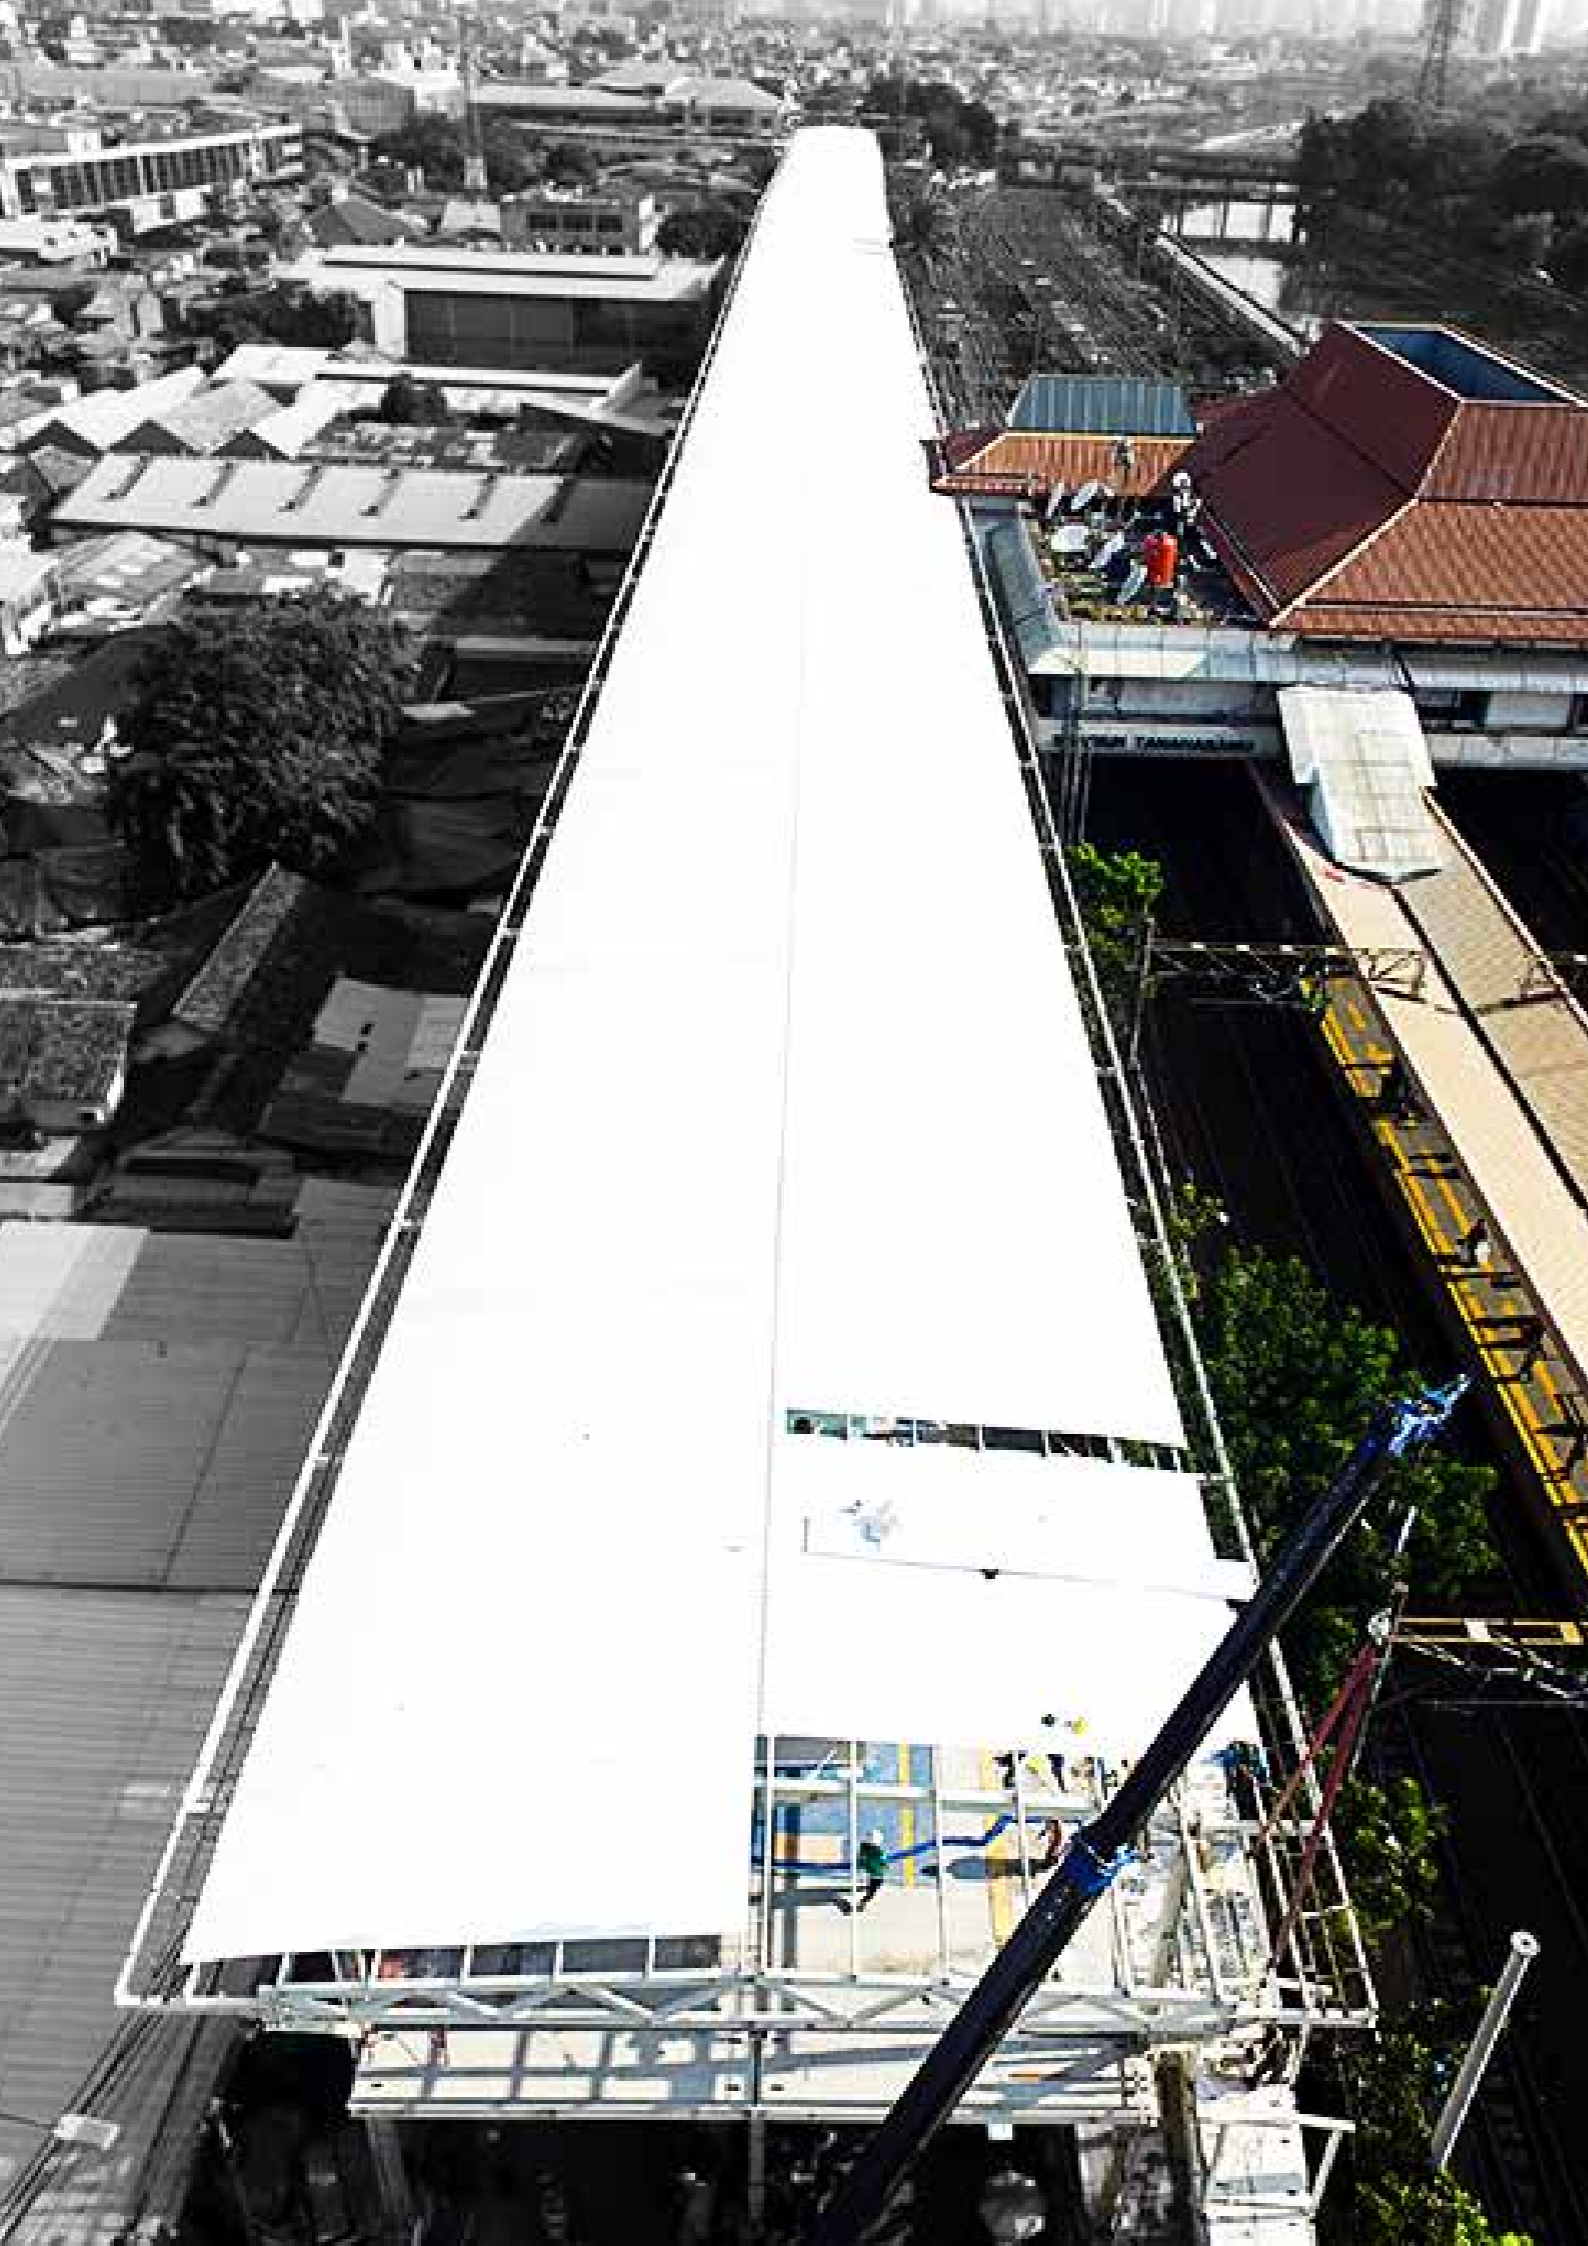

| | |
|--------|----------------------|
| Type | Dop Waterhose Flexo |
| Size | 1/2", 5,8", 3/4", 1" |
| Lenght | 50 m |
| Warna | Green, Blue |
